## The Magic of Garcy Stud

Not only do Garcy Studs disappear, they also offer these basic advantages:

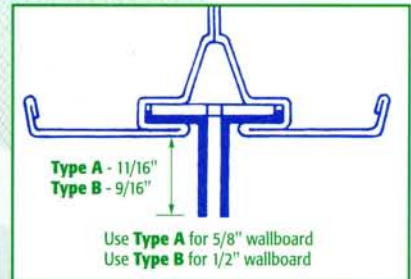

- **VERSATILE** - the system accepts brackets for shelves, garment rails, and a wide variety of display hardware made by Crown Metal, Capitol Hardware, Garcy, and Reeve.
- **EASY TO USE** - the slotted standards are leveled simply by tapping up or down. They anchor in seconds with self-drilling screws.
- **COMPATIBLE** - Garcy Studs work with standard drywall components used by drywall contractors everywhere.
- **ECONOMICAL** - Garcy Studs go up the same way regular metal studs go up - fast, easy, and inexpensively.

## Ordering Information

**No. 701** One-way

**No. 702** Two-way

Slotted standard has 1/2" slots on 1" centers, .080" thickness steel. Will support brackets and other hardware from Crown Metal's Champion Series, Capitol Hardware's A-line, Garcy's Basic Line and Reeve's Universal Line.

**No. 1201** One-way

**No. 1202** Two-way

Slotted standard has 1" slots on 2" centers, .125" thick steel. Will support brackets and other hardware from Crown Metal's Command Series, Capitol Hardware's C-line, Garcy's Super Line and Reeve's 700 Line.

**No. 1301** One-way

**No. 1302** Two-way

Slotted standard has 1/2" slots on 1" centers, .125" thick steel. Will support brackets and other hardware from Crown Metal's LeMans Series, Capitol Hardware's B-line, Garcy's Bonus Line and Reeve's 800 line.

In addition to catalog number, order should specify:

1. Stud length (up to 16 ft.).
2. Length of slotted standard (72-84-96" are standard; others available on special order).
3. Type A (with 11/16" trim angles for 5/8" wall board) or Type B (with 9/16" trim angles for 1/2" wallboard).

Special trim angle sizes (13/16" or 11/16") available on special order.

# NOW YOU DON'T!

Call It Magic.

Call It Genius.

Call It Garcy Stud!

**G**arcy Stud is an integrated metal stud and slotted standard that teams up with conventional drywall metal studs and gypsum wallboard. All-in-all, it's a pretty typical hardware system... or is it?

**T**he illusion is that the slotted standard can be concealed behind the wall on one side or both. This little hocus-pocus puts the focus on your wall - not on the hardware supporting it. It makes a more attractive finished installation; one that doesn't distract from the merchandise on display.
